Dental Hygiene Clinic

Dental hygiene students perform cleanings, take radiographs (x-rays), administer dental anesthesia, give fluoride treatments and apply sealants. They also perform oral cancer exams, check your blood pressure, and pulse and give homecare tooth brushing instructions. The Dental Hygiene Clinic is a teaching clinic: therefore, patients receiving dental hygiene care will be participating in the teaching program. Only patients whose care is suitable for teaching purposes are eligible for treatment in the clinic. New Patients require an initial evaluation or assessment appointment to determine if they are eligible. Patients not offered dental hygiene treatment will be referred for treatment to a dentist of their choice. Some patients may initially qualify for treatment and later, after initial therapy is completed, may no longer be considered appropriate as teaching cases; in this case, services will be discontinued, and a referral will be provided. The dental hygiene faculty reserves the right to refuse or discontinue treatment. Dental hygiene treatment will be performed by a student and will be supervised faculty. Treatment received in our clinic requires *significantly* more time than care provided in a private dental practice.

Most appointments are approximately three hours in length. For adults, multiple appointments are usually irequired.

For children under 18 years of age, a parent or legal guardian must remain in the clinical facility during the appointment and must sign the Consent for Treatment form.

Individuals who have difficulty reading or speaking English must provide an interpreter at every appointment.

Scheduling maintenance visits will be the patient's responsibility.

Patients are responsible for all personal items brought into the Phoenix College dental clinic.

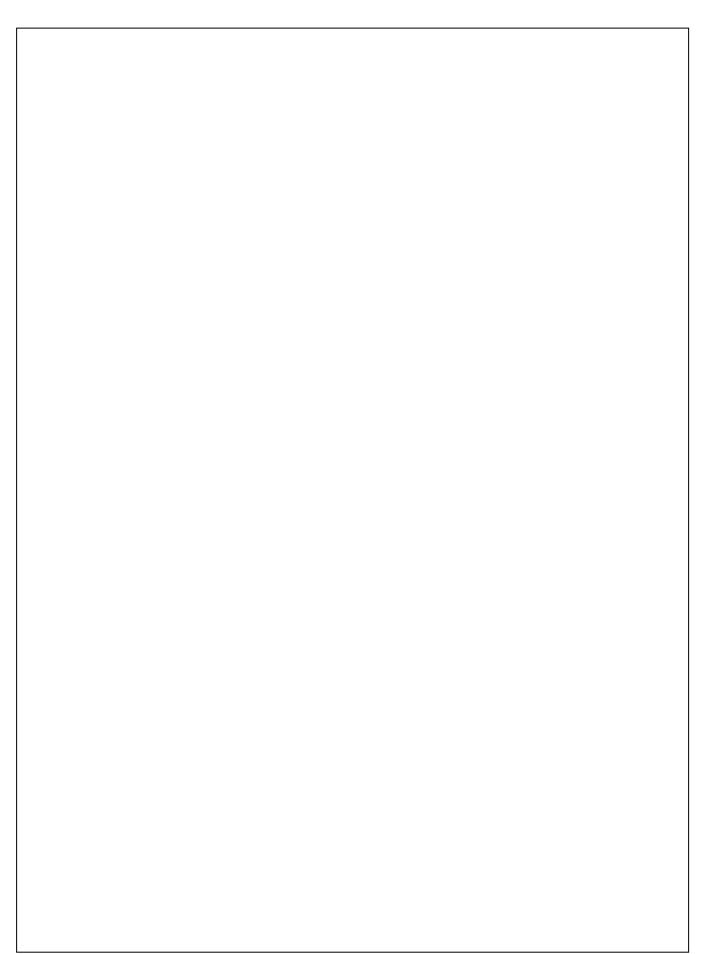

Phoenix College will not be responsible for any lost or misplaced personal items.

Right and Responsibilities

- 1. Patients of our facility will be given considerate, respectful and confidential treatment. Mutual respect from patients towards the dental clinic team members (faculty, students, dentists, and staff) is expected. Our goal is to complete any treatment started; however, as an educational facility, we must work within certain constraints and limitation. The educational setting makes it impossible for us to consistently provide patients with long-term care. We will be happy to give you referral information for dental procedures we cannot provide. Upon your request and consent, we will send your radiographs to the dentist of your choice for a hominal duplicating fee.
- 2. Our facility is closed approximately FIVE months per year (winter, spring and summer breaks, and all other observed holidays). Due to this limited schedule, we suggest and encourage you to maintain relationships with dental practitioners in the community to ensure that all your dental needs can be met.
- 3. You will have access to complete and current information about your condition and will be required to give your consent for ktreatment. You will be provided with an explanation for recommended treatment, alternatives, the option to refuse ktreatment, and the kexpected outcome of various treatments.
- 4. Payment is required prior to services being rendered. We will give you a receipt to send to your insurance company for reimbursed of fees. Fees are honored until the care plan is complete and/or for the duration of the academic year.
